# MOULDINGS

**Free Form Factory** offers a complete line of custom Architectural Foam building components. We utilize a unique polystyrene substrate as the architectural core. The polystyrene is shaped using a high speed, computerized shaping system that allows for limitless design capabilities.

From very simple to very ornate –  
From large to very large you can  
save serious dollars using Free  
Form Factory's moldings. Compare  
to wood or Precast Concrete, you'll  
marvel at the low cost and ease of  
installation. Either for interior or  
exterior applications whether  
straight, curved or bendable.
